

1.0 PURPOSE

The purpose of this policy is to determine the commitments and targets of Naturel Yenilenebilir Enerji A.S. regarding environmental management within the scope of renewable energy with the priorities of protecting the environment, preventing the problem at its source, securing human health and raising living standards to the highest level.

2.0 SCOPE

This policy covers all employees and activities of Naturel Yenilenebilir Enerji A.S.

3.0 PRINCIPLES AND PRACTICES

Our Environmental Policy consists of the following items;

Environmental Management System

The objectives of this policy are to promote continuous improvement of the environmental and social performance through the effective use of ISO 14001:2015 environmental management system.

Climate Change

This policy outlines a responsibility approach to climate impacts and greenhouse emissions, resource management and pollution prevention and control.

Due to the approach adopted by Naturel Yenilenebilir Enerji A.S., appropriate mitigation measures, technologies and practices are targeted for efficient and effective resource use, pollution prevention and control and avoidance, minimisation and reduction of greenhouse emissions.

Dialogue

Our cooperation and dialogue with our customers, services, employees, suppliers and all other third parties to achieve our environmental goals is in the spirit of partnership and trust.

Naturel Yenilenebilir Enerji A.S. recognizes the importance of conducting integrated assessments to identify environmental risks and impacts associated with its objectives and customer management of environmental and social performance. A successful and effective environmental management system supports healthy and sustainable environmental and social performance and can improve financial, environmental and social outcomes. This is a dynamic and ongoing process initiated and supported by the management board and includes meaningful communication between all partners.

Risk Management

Naturel Yenilenebilir Enerji A.S. recognises the importance of addressing both the causes and the consequences of climate change in its countries of operations. Naturel Yenilenebilir Enerji A.S. will engage, whenever appropriate, in innovative investments and technical assistance to support non/low-carbon investments and

climate change mitigation and adaptation opportunities, as well as identify opportunities to avoid, minimise or reduce greenhouse gas emissions in projects. Naturel Yenilenebilir Enerji A.S. will also support in developing climate adaptation measures and climate resilient investments as well as in managing risks caused by climate change.

Education

It has been accepted by both international and national public opinion that corporate perception and approaches have an important place in achieving environmental goals. In this regard, environmental education and environmental awareness have been adopted by Naturel Yenilenebilir Enerji A.S. as one of the tools of contemporary environmental policy.

Monitoring of Environmental Performance

Naturel Yenilenebilir Enerji A.S. aims to carry out measurements and controls in accordance with environmental Laws and Regulations to monitor environmental performance indicators. It also carries out to audit and monitor processes and activities that have significant environmental impacts.

Chemicals: Using Safely and Effectively

Naturel Yenilenebilir Enerji A.S. determines the conditions to protect the health of employees from effects of chemical and biological substances used or processed in the workplace and provides a safe working environment. Chemical and biological hazards in the risk analysis involving our activities are evaluated in accordance with 98/24/EC directives are taken into consideration and suitable personal protective equipments are determined for all activities.

Evaluation of Noise Emission

Naturel Energy shows sensitivity to its employees, customer private areas and civilians in keeping air emissions, environmental noise and vibration occurring from its activities. Noise emissions from Naturel Energy facilities do not exceed the limits declared in Regulation No. 27601. In addition, maximum noise values are taken into consideration in densely populated areas, quiet places in open areas, schools, hospitals and military areas.

Water Management

Clean water resource is the one of the most sensitive value in nowadays. Limited water, uncarefull management and impact of climate change on water resources will result in limited availability and quality which in-turn may lead to inequitable distribution, especially in water scarce areas. Naturel Yenilenebilir Enerji A.S. is aware of the importance of water and the impacts if water is not available. Naturel Yenilenebilir Enerji A.S. has therefore integrated water management into its ISO 14001:2015 Environmental Management System in order to ensure that water utilization of all operations is managed in accordance with the compliance regulations of all places where it operates. Naturel Yenilenebilir Enerji A.S. supports the UN Sustainable Development Goal 6 on clean water (SDG6) and has set targets to reduce the volume of water consumption across all business units. In addition to all these, we also closely monitor our corporate water footprint.

Waste Management

Due to the diverse nature of activities undertaken by Naturel Yenilenebilir Enerji A.S., a wide variety of wastes are produced and collected, ranging from general wastes and recyclable materials, through to hazardous and non-hazardous wastes. Naturel Yenilenebilir Enerji A.S. has a duty to ensure that all of these wastes are disposed of responsibly, using approved, registered waste contractors.

E-Waste Management

Our company aims to recycle e-waste that has lost its usability and ensure that it is destroyed by taking environmental and safety precautions. All e-waste is included in the process in a way that does not contain corporate or personal information.

SOx, NOx and VOC Criteria

Our company acts with the aim of reducing the use of fuel containing sulfur in line with the goal of reducing SOx and NOx emissions. In addition, it prefers the chemicals it uses in this context to be environmentally friendly and with VOC free content.

Energy and Resource Efficiency Management

Energy and resource efficiency approach of Naturel Yenilenebilir Enerji A.S. is directly related to the sustainability of growth and social development goals. Due to the key role this approach plays in reducing total greenhouse gas emissions, it is one of the areas that are handled with sensitivity.

Naturel Yenilenebilir Enerji A.S. carries out its activities by taking into consideration both legal Laws and Regulations and 2023/1791 (EU) Directive.

Carbon Footprint Management

In line with the Paris Climate Agreement 2050 net zero targets, we measure our carbon footprint in accordance with ISO 14064 standard and develop projects aimed at reducing it. We aim to sell the benefits resulting from renewable energy production to companies which plan to neutralize their carbon footprint in the market by issuing carbon certificates.

In addition, as Naturel Enerji, we are renewable energy producers and we are targeting to issue carbon certifications and trade them in the market to help other companies offset their carbon footprints.

Biodiversity

In the scope of our Environmental Policy; we engage to work to increase biodiversity, which is critical for the sustainability of the world while developing projects. We are trying to develop agro-solar power plant projects in applicable regions in order to protect and increase biodiversity.

Reviewing of Policy

We review our Environmental policy with Corporate Governance Committee once a year, evaluate its effectiveness and make necessary improvements.
