

ENVIRONMENTAL AND ENERGY POLICY

As an institution that is aware that sustainable growth, which we place on the main axis of our activities, is possible as long as we live the principles of sustainable environment and energy;

- To use all resources efficiently, to increase recycling and recycling,
- To take into account the technologies that provide energy efficiency and are environmentally friendly while creating all processes from the design stage,
- Developing land and hybrid type solar power plants that will have a positive effect on climate change, which is our main field of activity, and establishing turnkey,
- To purchase products, services and technologies that provide energy efficiency,
- We aim to carry out our turnkey GES installation activities by implementing Environmental and Energy Management Systems.

In this respect;

- To comply with all applicable legal and other requirements related to environment and energy,
- To continuously improve and improve our environmental and energy performance,
- To take the necessary measures to reduce or eliminate the negative environmental effects of our activities,
- To periodically review our determined goals and objectives, to create the necessary resources to achieve these goals and objectives,
- Increase awareness and sensitivity by ensuring that our policy is understood and adopted by our stakeholders

We declare and undertake.
